

# table of contents

**foreword by Samuel Adler**

**preface by Daniel Druckman**

1 **introduction**

7 **1 . general logistics**

Instrument choice

Over-scoring

8 Large setups and rehearsal considerations

Visuals

Noise

9 Budget

Space

Music that will be frequently performed

Exotic instruments

Electronic percussion

10 Instruments percussionists do not play

Multiple percussionists

Logistics

11 Section setup

Timpanists

Broadway pit

12 Non-percussionists playing percussion

Chairs and stands

How fast percussionists can play

General conditions

13 Specific tempi

14 Unidiomatic writing - music that often requires memorization

Dynamics

15 Physical exertion and shaking

Reaching instruments

Instruments with pedals

16 Moving with hand-held instruments

Working with headphones

- 17 Melodic lines or counterpoint in a setup of different instruments
- Multiple instruments for a specified instrument
- 18 Pitch bending
- Vibrato
- 19 Sympathetic resonance
- 20 Adding mass to instruments

## 21 **2. general notation**

- Instrument list
- 22 Instrument key
- 23 Setup diagram
- Abbreviation
- Language
- 24 Symbol notation
- Divided or undivided parts / Score part or separate parts
- Undivided score part
- 26 Divided score part
- 27 Separate parts
- Multiple copies of parts
- Handwritten versus computer-generated parts
- Cues
- 28 Notating percussion in a conductor's score
- Notating unpitched percussion
- Staves
- 30 Noteheads
- Adding pitched instrument staves to unpitched instrument systems
- 31 What goes where on the staff
- 32 The chicken or the egg?
- Clefs
- 33 Key signatures
- 34 Unspecified instruments (indeterminate instrumentation)
- How much to notate
- Systems of notation for which there is no standard
- Return to a "normal" method of playing
- Dynamics
- 35 Rolls
- Rolling on one surface
- 36 Rolling on two surfaces
- Rolling on four surfaces
- 37 One-handed rolls
- 39 Rolling on three surfaces
- Rolling from the resonance of a previous attack
- Bowed instruments
- 41 Articulation and phrasing
- Dead stroke
- Note lengths
- Exact or inexact note-length indications
- 43 Damper pedals
- 44 Muting (muffling, dampening)
- Sustaining instruments
- 45 Orchestrating to evoke the sounds of different cultures

- 47 **3. beaters**  
To indicate or not to indicate?  
Beater lingo
- 48 Logistical beater issues  
Problems with extreme register
- 49 Beater tricks
- 50 The shaft and butt of beaters
- 51 Sticks
- 52 Mallets
- 53 Triangle beaters, knitting needles  
Brushes
- 54 Chime hammers  
Rute  
Hands  
Sticks as instruments

- 55 **4. tone color**  
Factors that affect tone color  
Dynamics  
Beaters
- 56 Placement of attack  
Muting
- 57 Unpitched instruments (indeterminately pitched instruments)
- 58 Timbral specifics of cymbals and tam-tams  
Miscellaneous timbral effects

- 59 **5. drums**  
Sticks on drums
- 61 Mallets on drums  
Hands on drums
- 62 Playing on the rim or shell  
Placement on the head
- 63 Mutes  
Drum size  
Two-headed drums  
Pitch bending
- 64 Multiple drums in setups  
Idiomatic writing for drums
- 65 Types of drums  
Timpani
- 66 Ranges
- 67 Changing pitch  
Multiple timpanists
- 68 Obsolete notation  
Timpani extended technique  
Harmonics  
Sympathetic resonance  
Striking the bowl  
Prepared timpani
- 69 Timpani as unpitched instruments

69	Tom-toms, snare drum, field drum, tenor drum, timbales, roto-toms, bongos, congas, tamborim
	Snare drum
70	Tenor drum and timbales
	Roto-toms
71	Bongos and congas
	Other drums
72	Frame drum, djembe, dumbek
	Bass drums
73	Drumset

## 75 **6. keyboard percussion**

	Ranges
	Marimba
76	Vibraphone
	Xylophone
77	Glockenspiel
	Crotales
	Chimes
78	Resonators
	Pedals
	Vibraphone motor
79	Removing notes from the set
	Idiomatic writing for mallet instruments
	Thumbs and pinkies
82	Idiomatic writing for chimes
83	Stacked instruments
84	Rolls
	Balance problems
	Overtone interference
85	Figurative writing for glockenspiel and crotales
	Glockenspiel as an extension of the vibraphone
	Multiple players
	Special effects
	Striking the edge of the bar
86	Glissandi
	Node
87	Harmonics
	Mouth vibrato
88	Glockenspiel vibrato
	Pitch bend
	Clusters
	Prepared instruments
	Marimshot
89	Church bell effect
	Miscellaneous

- 91 **7. metal**  
Cymbals  
Multiple cymbals  
Suspended cymbals  
92 Special suspended cymbals  
93 Hi-hat  
94 Crash cymbals  
Ring  
Pick up/put down time  
Speed  
Crash articulations  
Rolls  
95 Mounting crash cymbals on a hi-hat stand  
Bass drum/cymbal attachment  
Gongs  
Tam-tam  
96 Nipple gong  
Wind gong  
Chinese opera gong  
Other gongs  
Gong stands and racks  
97 Triangle  
Cowbells, agogo bells, almglocken  
98 Japanese temple bowls, mixing bowls  
99 Brake drums, anvils, metal pipes  
Thundersheet  
Steel drums (steel pans)  
100 Special effects  
Scrape  
Water  
Prepared instruments

- 101 **8. wood**  
Woodblocks, templeblocks, log drum  
102 Claves  
Wood drums  
Cajón

- 103 **9. miscellaneous instruments**  
Bottles  
104 Cabasa  
Castanets  
Church bells (ship bells, Berlioz bells)  
Coconuts  
Conch shell  
105 Crystal glasses  
Finger cymbals  
Flexatone  
Friction Roll (finger rub and Superball mallets)

106	Guiro (gourd), washboard Hammer as used in Mahler Symphony No. 6 Hand bells Lion's roar
107	Maracas, shakers
108	Mark tree, wind chimes, bell tree
109	Pop gun Quica (cuica) Rainstick
110	Ratchet Rice bowls Rute Sandpaper blocks Sirens
111	Slapstick, whip Sleighbells Stones, prayer stones Tambourine
112	Thumb piano (African thumb piano, kalimba, mbira)
113	Vibraslap Whistles Wind machine

## Appendices:

115	<b>A. sample setups</b>
135	<b>B. scores with comments</b> Shawn Crouch, <i>Suspended Contact</i>
142	Jefferson Friedman, <i>Sacred Heart: Explosion</i>
147	Ryan Streber, <i>Rondel</i>
150	Nico Muhly, <i>Sustained Music</i>
153	<b>C. beaters</b>
157	<b>D. dynamics</b>
161	<b>E. suggested works</b>
171	<b>sources</b>
173	<b>index</b>
